The Amphibious Warfare Industrial Base Coalition (AWIBC) is a trade coalition of suppliers of systems, components, parts, and services toward the construction and sustainment of the U.S. Navy's amphibious warfare ships. Recently, Paul Roden, chair of the AWIBC, responded to questions below from Senior Editor Richard R. Burgess.

**Has AWIBC membership increased or decreased over the last year?**

RODEN: The Amphibious Warship Industrial Base Coalition is a robust and growing organization. We continue to see strong interest from suppliers who recognize the importance of a unified voice in advocating for the stability of our nation's defense industrial base that supports the men and women of our Navy and Marine Corps.

**Is the amphibious warship industrial base in better or worse shape than last year?**

RODEN: We are incredibly grateful for recent funding in support of amphibious warships, including the multi-ship buy for LPD 33, LPD 34 and LPD 35 as well as LHA 10. However, our most recent survey data shows that less than 10% of our suppliers are operating at full capacity due to inconsistent demand signals. As this new funding is placed on contract, it will help rejuvenate production lines and inject much-needed stability into the industrial base.

**With all of the efforts to shore up the shipbuilding workforce, how healthy is the workforce of the suppliers?**

RODEN: The most critical factor in the health of the industrial base workforce is stable and predictable funding. Our survey data shows a direct link between inconsistent demand and the challenge of maintaining a skilled workforce. With a clear and consistent demand signal from the government, we can unlock the full capacity of a domestic industrial base that is 100% committed to delivering the ships our warfighters need.

**How did the well-funded reconciliation law affect the amphibious warfare ship suppliers?**

RODEN: The funding for the bundle buy was a significant and welcome investment. That funding is helping to rejuvenate idle production lines and inject much-needed stability across the amphibious warship industrial base. More than 50% of suppliers agree that the multi-ship buy has added predictability,

helping plan for on-time deliveries. It was a crucial investment for the suppliers in our coalition and we are grateful for that support.

**Are you seeing any improvements in amphibious warfare ship construction schedule stability?**

RODEN: While the recent funding was a significant and welcome commitment, true schedule stability can only come from consistent and predictable funding through multi-year appropriations. To the extent that many of our suppliers support new construction across both amphibious ships and other critical naval assets, stable funding benefits the entire shipbuilding industrial base committed to delivering America's maritime dominance.
