

CENTCOM Conducts Precision Airstrike Against Iran-Backed Houthi Facility in Yemen

From U.S. Central Command, Dec. 16, 2024

TAMPA, Fla. – On Dec. 16 Yemen time, U.S. Central Command (CENTCOM) forces conducted a precision airstrike against a key command and control facility operated by Iran-backed Houthis within Houthi-controlled territory in Sana'a, Yemen.

The targeted facility was a hub for coordinating Houthi operations, such as attacks against U.S. Navy warships and merchant vessels in the Southern Red Sea and Gulf of Aden.

The strike reflects CENTCOM's ongoing commitment to protect U.S. and coalition personnel, regional partners, and international shipping.
