NEW ORLEANS – The Coast Guard continues to respond to impacts to the waterways and assess the environmental threats across Southeast Louisiana Sept. 9, post-Hurricane Ida, the Coast Guard 8th District said in a release.

In partnership with the U.S. Army Corps of Engineers and the Navy Supervisor of Salvage and Diving (SUPSALV) the Coast Guard is continuing efforts to reopen waterways impacted by Hurricane Ida in the areas of Bayou Lafourche, Houma Navigation Canal and portions of the Intracoastal Waterway.

Obstructions to the affected waterways are being identified and removed to restore the area to pre-storm conditions.

To date, 25 obstructions comprised primarily of fishing vessels, crew vessels, and offshore supply vessels have been identified in the Bayou Lafourche channel. Additionally, 30 submerged targets have been identified in the Houma Navigation Canal. Fifteen of those targets in the Houma Navigation Canal have been cleared or removed.

The Coast Guard also continues to receive and investigate all reports made to the National Response Center.

Coast Guard crews are working to identify and prioritize threats to the environment and navigable waterways through overflights and surface inspections of areas impacted by the

storm.

The Coast Guard is working closely with the State of Louisiana, Environmental Protection Agency, and Department of Environmental Quality, to respond to reports of pollution.
