Contract Extends HII's ISR Mission Support Across Domains

MCLEAN, Va., (Oct. 17, 2023) – HII (NYSE: HII) announced today that its Mission Technologies division was awarded a \$244 million task order to integrate Minotaur software products into maritime platforms for the U.S. Navy, U.S. Marine Corps and U.S. Coast Guard.

HII was awarded this contract under the Department of Defense (DoD) Information Analysis Center's (IAC) multiple-award contract (MAC) vehicle. IAC MAC task orders are awarded by the U.S. Air Force's 774th Enterprise Sourcing Squadron to develop and create new knowledge for the enhancement of the Defense Technical Information Center repository and the research and development and science and technology community.

Under the Naval Air Systems Command task order, HII will perform research, development, test and evaluation to facilitate the integration of Minotaur Family of Services products into the services' maritime platforms to meet intelligence, surveillance and reconnaissance warfighting requirements.

Minotaur products support the warfighter by enhancing sensor

performance and presenting data from multiple types of sensors, including radar and C5ISR equipment, into a single common operating picture and transmitting that data to other platforms and units during operations.

HII has been the first and only industry prime developer of Minotaur since the program was first awarded to industry in 2020.

The contract has a five-year period of performance, with work conducted at contractor facilities in various U.S. locations.

“HII has been at the forefront of Minotaur software development for nearly a decade,” said Andy Green, executive vice president of HII and president of Mission Technologies. “It’s a privilege to continue this mission-critical work and to concurrently deliver the advantage to three branches of the Armed Forces.”

“We are pleased that the Navy has selected this proven technology to meet the combined requirements of next-generation Navy, Marine Corps and Coast Guard ISR platforms,” said Todd Gentry, president of Mission Technologies’ C5ISR business group. “We have assembled an outstanding team and look forward to expanding our longstanding partnership with the Navy and supporting the tri-service maritime strategy.”
