

HII Awarded Tactical Training Systems Contracts by the Naval Air Warfare Center

The Navy has awarded two tactical training systems contracts to HII for aircrew electronic warfare tactical training and tactical integrated threat/target training systems. *HII* MCLEAN, Va. – HII has been awarded two tactical training systems contracts by the Naval Air Warfare Center China Lake, the company said May 2.

The first contract, for aircrew electronic warfare tactical training, is a multiple-award, indefinite quantity/indefinite delivery contract with a total ceiling value of \$249 million. The second contract, for tactical integrated threat/target training systems, is also a multiple-award, IDIQ contract with a total ceiling value of \$92 million. Both contracts have a five-year continuous ordering period.

Under these contracts, HII will have the opportunity to bid on task orders to provide research, development, engineering, sustainment, upgrades, integration, testing and cybersecurity for the U.S. Navy's tactical and electronic warfare threat systems and tactical threat systems.

“For more than 20 years, HII has been dedicated to the Navy's training missions, providing expertise in live, virtual, constructive cutting-edge software, modeling and simulation, engineering, systems integration, networking and virtual technology, as well as large-scale operations and maintenance,” said Glenn Goodman, president of LVC Solutions business group within HII's Mission Technologies division. “It is imperative our nation's training environments provide real world mission rehearsal support for our warfighters, and we look forward to continuing to provide the Navy with world

class support to the mission.”
