

HII Deepens Partnership with Babcock International Group for Submarine Construction

[Release From HII](#)

ARLINGTON, Va., Dec. 09, 2025 (GLOBE NEWSWIRE) – HII (NYSE: HII) and Babcock International Group (Babcock) announced today they have signed a contract that expands their strategic partnership to further support *Virginia*-class submarine construction throughput at HII’s Newport News Shipbuilding (NNS) division. Additionally, the contract will build resiliency within HII’s submarine supply base.

This is the first *Virginia*-class outsourced contract to Babcock in support of NNS-specific submarine work, authorizing Babcock to build complex submarine assemblies at the Rosyth facility in Scotland for *Virginia*-class Block VI fast-attack submarines.

The expansion of the partnership with Babcock will increase

the number of suppliers that can perform large structure work with requisite quality.

“This is a significant next step in delivering on our joint commitment to enhance both organizations’ capabilities, for the benefit of U.S. and U.K. programs,” said Chris Kastner, HII president and CEO. “Leveraging Babcock’s reach and expertise in the U.K. will reinforce our supplier base, strengthen submarine production in the U.S., and support the trilateral AUKUS partnership.”

David Lockwood, CEO Babcock International Group said, “Babcock’s advanced manufacturing expertise has enabled us to build on our established missile tube assembly capability, to deliver additional components for the U.S. submarine fleet. This expansion of our strategic partnership with HII enables us to optimize our joint capabilities for the benefit of the wider AUKUS security partnership.”

[In July 2023](#), HII and Babcock entered into a strategic agreement to collaborate on naval and civil nuclear decommissioning and construction opportunities in the U.K. and U.S.

Since then, the companies have successfully worked across the United States, United Kingdom and Australia, including the [Australian Submarine Supplier Qualification \(AUSSQ\) program](#) to accelerate the identification and qualification of Australian suppliers and products into the U.S. submarine industrial base. The program is working toward expanding to include products entering the U.K. submarine industrial base for the *Astute*-class.

At Defence and Security Equipment International (DSEI) earlier this year, Babcock and HII [signed a memorandum of understanding](#) to bring together HII’s REMUS unmanned underwater vehicles (UUVs) and Babcock’s world-leading submarine Weapon Handling and Launch Systems (WHLS). The

collaboration aims to deliver UUV torpedo tube launch and recovery (TTLR), strengthening the undersea advantage of the U.K. Royal Navy and allied navies.
