WASHINGTON – The U.S. State Department has approved the possible Foreign Military Sale of MH-60R Seahawk helicopters along with support and related equipment to Spain, the Defense Security Cooperation Agency said March 15.

The DSCA said the total cost of the program would be approximately \$950 million. Approved was the possible sale of eight MH-60Rs, built by Lockheed Martin.

The sale also would include engines, avionics, data links and other communications systems, APS-153 radars, electronic countermeasures and support systems, Airborne Low-Frequency Sonars, rocket launchers, AGM-114R(N) Hellfire missiles, Advanced Precision Kill Weapon System rockets, GAU-21 machine guns, and sonobuoys, as well as a flight simulator, spare parts, publications, training, engineering, logistics, ferry and technical support.

“The proposed sale will improve Spain’s capability to meet current and future threats. The MH-60R Multi-Mission Helicopter will provide the capability to perform anti-surface and anti-submarine warfare missions along with the ability to perform secondary missions including vertical replenishment, search and rescue, and communications relay and will bolster the Spanish navy’s ability to support NATO and remain interoperable with the U.S. and the NATO alliance,” the announcement said.

Spain currently operates SH-60F versions of the Seahawk.

Spain would become the eighth nation to procure the MH-60R. The MH-60R is in service with the U.S. Navy, Australian navy, Danish navy, Saudi navy, and Indian navy. Greece and the Republic of Korea also have ordered MH-60Rs.
