

# Navy Awards L3Harris \$380 Million Contract for Cooperative Engagement Capability

L3Harris Technologies will produce and support the Cooperative Engagement Capability for the U.S. Navy under a contract worth up to \$380 million. *U.S. NAVY*

MELBOURNE, Fla. – The U.S. Navy awarded L3Harris Technologies a contract worth up to \$380 million for the production, repair, and sustainment of the Cooperative Engagement Capability (CEC) system with an initial award of \$15 million, the company said in a July 19 release.

The CEC system enables high-quality situational awareness and integrated fire control capability for the battle force. It is designed to enhance the anti-air warfare capability of U.S. Navy ships, U.S. Navy aircraft, U.S. Marine Corps Composite Tracking Network and allied nation units and is a key element of the U.S. Navy's integrated sensors and networked communications solution set.

“L3Harris is the trusted global provider of resilient, all-domain communications networks, and with this CEC agreement, the Navy has affirmed we deliver best-in-class capabilities to employ mission critical data for their most important missions,” said Brendan O’Connell, president of Broadband Communication Systems at L3Harris.

“The CEC enables the Navy, Marine Corps and coalition forces to sense, defend and strike earlier than the threat, increasing the survivability of the battle force and the overall speed of communication as they maneuver in a complex, multi-domain battlespace.”
