

Progeny Systems to Develop Weapon Launch Modernization Upgrade for Virginia Class Submarines

From General Mission Systems, July 11, 2024

FAIRFAX, Va. – General Dynamics Mission Systems Progeny Systems announced today that it was [awarded](#) an \$11,996,038 cost-plus, fixed-fee modification to a previously awarded contract to exercise options to provide engineering and technical support for modernizing Virginia Class Block I/II submarines with the Common Weapon Launcher (CWL) system, along with the continuance of other ongoing projects. Work will be performed in Manassas, Va., and is expected to be completed by July 2026.

“Progeny Systems has many years of experience supporting the U.S. Navy’s submarine programs, especially in combat systems. We are pleased that the Navy has contracted with us to modernize older Virginia Class submarines with the capable and flexible CWL system. The Progeny Systems team also offers software and hardware platforms for payload control, tactical control, torpedoes, acoustics, cybersecurity, electronic warfare and mission readiness. We look forward to delivering this modern weapon launch capability to our Navy customers,” said Laura Hooks, vice president and general manager of Maritime and Strategic Systems at General Dynamics Mission Systems.

[Progeny Systems](#) was acquired by General Dynamics Mission Systems in 2022. Headquartered in Manassas, Va., Progeny Systems provides a wide spectrum of capabilities and lifecycle

support services for U.S. submarines and surface ships.
