

# RTX's Raytheon Awarded \$590 Million Production Contract for Next Generation Jammer Mid-Band

An NGJ-MB pod is flown on the middle starboard wing station of an EA-18G Growler electronic attack aircraft.

From RTX Raytheon, Dec. 5, 2024

*System plays critical role delivering revolutionary combat capability*

MCKINNEY, Texas, Dec. 5, 2024 /PRNewswire/ – Raytheon, an RTX (NYSE: RTX) business, has been awarded a \$590 million follow-on production contract from the U.S. Navy for the Next Generation Jammer Mid-Band (NGJ-MB) system.

NGJ-MB is a cooperative development and production program with the Royal Australian Air Force (RAAF). The contract includes delivery of shipsets, support equipment, spares and non-recurring engineering support.

“NGJ-MB is a revolutionary offensive electronic attack system for the joint force that puts a critical combat capability in the hands of our Navy warfighters,” said Barbara Borgonovi, president of Naval Power at Raytheon. “We’re working with the U.S. Navy to ensure NGJ-MB provides the advanced electronic warfare solution needed as quickly as possible.”

The U.S. Navy and RAAF will employ NGJ-MB on the EA-18G *GROWLER*® to target advanced radar threats, communications, data links and non-traditional radio frequency threats. The system reduces adversary targeting ranges, disrupts adversary kill chains and supports kinetic weapons to

target. NGJ-MB allows naval crews to operate effectively at extended ranges and attack multiple targets simultaneously with advanced techniques.

Work under this contract will take place in McKinney, Texas; Forest, Mississippi; El Segundo, California; and Fort Wayne, Indiana through 2028.
