HONOLULU – The U.S. Coast Guard completed participation in Operation Nasse, a three-month operation conducted by Australia, France, New Zealand, and the U.S. to safeguard the invaluable marine resources of Pacific Island nations and the Western Central Pacific Ocean, July 12.

From July 1-12, an HC-130J Hercules airplane crew from Coast Guard Air Station Barbers Point patrolled the South Pacific High Seas in and around the Exclusive Economic Zones of Australia, New Caledonia, Fiji, New Zealand, Tonga, Niue, and the Cook Islands to detect, investigate and report any illegal, unreported and unregulated (IUU) fishing activity.

During the operation, the Coast Guard collaborated with Pacific Quadrilateral Defense Coordinating Group (Pacific QUAD) partners to enhance their Monitoring, Control and Surveillance (MCS) tools and communications to support regional and national maritime surveillance efforts.

The wide-ranging operations were supported by the Pacific Islands Forum Fisheries Agency's (FFA) Regional Fisheries Surveillance Center (RFSC) and several FFA members to reinforce the conservation work of the Western and Central

Pacific Fisheries Commission (WCPFC) on the high seas. Alongside the P-QUAD partners, Fiji, Vanuatu, and the Cook Islands participated in the operation for the first time.

Coast Guard participation in Operation Nasse is part of Operation Blue Pacific, an overarching multi-mission Coast Guard endeavor promoting security, safety, sovereignty, and economic prosperity in the Pacific while strengthening relationships between partner nations.

“Oceania is vast, and the challenges of illegal fishing require a united front,” said Lt. Cmdr. Keith Arnold, HC-130J aircraft commander for U.S. Coast Guard Air Station Barbers Point. “Collaborating with the Pacific Quad and other regional partners to combine our resources and expertise to enhance monitoring tools is crucial to countering illegal fishing activities in Oceania. Sharing data, strengthening our communication networks, and coordinating patrols allows us to create a more comprehensive picture of what’s happening on the water in the region. This collaborative approach sends a strong message to those engaged in illegal fishing: we will work together to stop these activities and protect these vital resources.”

Joint efforts for Operation Nasse covered over 16,000 square miles, with the U.S. Coast Guard contributing:

- Over 58 hours of flight time
- 37 vessels sighted and analyzed
- Four potential Conservation and Management Measures (CMM) violations reported
- 240 hours of analyst-to-analyst collaboration and

training

Located in Honolulu, U.S. Coast Guard District Fourteen covers more than 14 million square miles of land and sea, conducting operations over the Hawaiian Islands, American Samoa, Saipan, Guam, Singapore and Japan.
