

U.S. Defends, Disables Threats in Response to Iranian Aggression

From U.S. Central Command, May 31, 2026

TAMPA, Fla. – U.S. Central Command (CENTCOM) conducted self-defense strikes on Iranian radar and command and control sites for drones in Goruk, Iran and Qeshm Island this weekend.

The measured and deliberate strikes occurred on Saturday and Sunday in response to aggressive Iranian actions that included the shutdown of a U.S. MQ-1 drone that was operating over international waters. U.S. fighter aircraft swiftly responded by eliminating Iranian air defenses, a ground control station, and two one-way attack drones that posed clear threats to ships transiting regional waters.

No American service members were harmed. CENTCOM will continue to protect U.S. assets and interests in response to unwarranted Iranian aggression during the ongoing ceasefire.
