RESTON, Va. – Leidos has been awarded a prime contract by the U.S. Navy's Naval Information Warfare Systems Command to support the service's undersea warfare systems, the company said March 17.

This single-award, Seaport Next Generation task order has a total estimated value of \$84 million. It includes a one-year base period, as well as four one-year options. Work will be performed in Virginia and Japan.

“Ensuring our Sailors have the most advanced capabilities to defeat advancing threats is a top priority for our company,” said Will Johnson, Leidos senior vice president, Logistics and Mission Support. “We look forward to continuing our longstanding support of the Program Executive Office – Undersea Warfare Systems as they work to keep the seas open and free.”

Through this contract, Leidos will provide operations and maintenance crews aboard USNS Tactical Auxiliary General Ocean Surveillance (T-AGOS) platforms and contract vessels. Additionally, the company will provide a cadre of field support team engineers to provide engineering, logistics and technical support to the Surveillance Towed Array Sensor System fleet and IUSS (Integrated Undersea Surveillance System) Operations Support Center.
