

Undersea Warriors: NATO Demos Collaboration During Exercise Dynamic Manta 25

By Allied Maritime Command, March 3, 2025

CATANIA, Italy – Six Allied submarines are planning to taking part in NATO's most advanced submarine warfare exercise off the coast of Italy between 28 February and 14 March 25. Exercise Dynamic Manta 25 brings surface ships, submarines, aircraft and thousands of personnel together in the Mediterranean Sea, where they will train, demonstrate and refine Allied capabilities in this particularly demanding type of warfare.

Dynamic Manta builds on the success of previous iterations, incorporating new tactics, technologies and operational insights, ensuring NATO's forces remain at the forefront of undersea warfare. The exercise prepares NATO submarine crews to respond and adapt to any type of threat below the surface.

Hosted by Italy, the exercise was planned by NATO Allied Maritime Command (MARCOM) based in Northwood, UK. Commander Submarines NATO, US Navy Rear Admiral Bret Grabbe, said this is the largest and most complex submarine exercise to take place in the Mediterranean Sea.

“Exercises like Dynamic Manta help NATO maintain the edge when it comes to anti-submarine warfare,” he said. “By practising coordinated operations against both conventional and advanced undersea threats, NATO continues to demonstrate its commitment to safeguarding the strategic waterways that connect member states.”

For only the third time since the exercise began in 2013, submarine assets will also work with Allied maritime Special

Operations Forces (SOF), consolidating interoperability with this critical asset. The capability of Allied SOF teams to cooperate with Allied submarines from different nations represents a force multiplier for NATO. For this iteration of the exercise, a Greek SOF team will make a landing from an Italian submarine to conduct its mission.

The aim of Dynamic Manta is to provide all participants with complex and challenging warfare training to enhance interoperability and proficiency in anti-submarine and anti-surface warfare skills. Each participating unit will have the opportunity to conduct a variety of submarine warfare operations. The submarines will take turns hunting and being hunted, closely coordinating their efforts with the air and surface participants.

The exercise plan to involve units, sailors and airmen from nine NATO nations.

The submarines belong to the navies of France, Greece, Italy, Türkiye and the United States, with NATO Submarine Command (COMSUBNATO) exercising operational control on several, as required by the exercise scenario.

Maritime Patrol Aircraft (MPA) from Canada, Germany, Greece, Portugal, Türkiye, the United Kingdom and the United States are also planning to take part, alongside Maritime Patrol Helicopters (MPH) from France, Italy and the US, supported by surface ships from Greece, Italy, Spain, Türkiye and the US.

Standing NATO Maritime Group 2 (SNMG2) is taking part, commanded by Turkish Navy Rear Admiral H. Ilker Avci.

As the host nation, Italy is providing support in Catania and Augusta Harbors, the naval helicopter base in Catania, Naval Air Station Sigonella, as well as support from Augusta Naval Base.

Representing Italy during the exercise as the host nation

guest is Rear Adm. Alberto Tarabotto, Commanding Officer, 4th Naval Division.

There are two sister ASW training events as part of NATO's continuous submarine warfare training and cooperation. Exercise Dynamic Mongoose which takes place in the cold waters of the North Atlantic, and Playbook Merlin which takes place in the shallow waters of the Baltic Sea.

Dynamic Manta is one of nearly a dozen MARCOM-led maritime exercises held each year in addition to numerous national exercises, which increase readiness in defense of the Alliance.
