PACIFIC OCEAN – U.S. Marines assigned to the 3rd Assault Amphibian Battalion, 1st Marine Division participated in a waterborne training evolution with Amphibious Combat Vehicles aboard amphibious transport dock ship USS Anchorage (LPD 23) in the Pacific Ocean, Feb. 12-13, Expeditionary Strike Group 3 said Feb. 15.

The two-day training evolution focused on the safety and ship-to-shore capabilities for both the Marine Corps and Navy, part of a larger training plan to refine tactics and doctrine for amphibious operations.

“The safety of our Marines and Sailors is a top priority, especially as we continue to test the capabilities of the newest Marine Corps platform,” said Rear Adm. Wayne Baze, commander, Expeditionary Strike Group 3. “The Sailors and Marines involved have received extensive training on operation of the craft, providing the Navy and Marine Corps team the opportunity to rehearse together for real-world events.”

During the evolution, the ACV demonstrated its survivability, maneuverability and robust swim capabilities by participating in a series of open-ocean swims between USS Anchorage and Marine Corps Base Camp Pendleton, California. USS Anchorage and designated safety boats remained in close proximity of the

ACVs throughout the entirety of the amphibious operations, ensuring safety in all aspects of training.

“As we strengthen naval warfighting as a force and pivot to operating in a contested littoral environment, conducting safe, realistic training on this platform advances our ability to respond swiftly to global threats in austere maritime conditions,” said the commanding general of the 1st Marine Division, Maj. Gen. Roger B. Turner. “The Amphibious Combat Vehicle is purpose-built to provide expeditionary lethality for Marines on the move.”

The Marines with 3rd Assault Amphibian Battalion, 1st Marine Division worked alongside Anchorage’s crew to successfully demonstrate the ACV’s ability to launch and recover from the well deck.

“This underway period is a true testament of the rigorous training our Sailors and Marines are doing to prepare for ACV waterborne operations,” said Baze. “They spend countless hours preparing, which is evident in the professional manner in which they conducted themselves throughout this evolution. I could not be more proud of each and every one of them.”

The ACV is an eight-wheel drive, armored vehicle with open-ocean capabilities and land mobility. It’s a unique combination of previously fielded amphibious vehicles and new technological advances to the fleet’s capabilities. The ACV’s ability to use the ocean and waterways to carry Marines and equipment provides expeditionary readiness to Marines on the move, wherever their mission takes them, across a variety of operating environments.
